MedStar Montgomery Medical Center

We strive to offer sophisticated, compassionate, and high-quality medical care in a personal and individualized atmosphere. With advanced medical technology, our hospital brings world-class specialty care to the community.

We offer a wide variety of specialty services, ones that are not always available in a community setting. We bring the best of both worlds to our patients by combining clinical excellence with convenient, local access. We are known for dependability and longevity and have been serving our community for 100+ years, and we continue to evolve to maintain cutting-edge offerings.

We have strengthened key community services in recent years, including OB/GYN, oncology, and orthopedic. MedStar Health is a leader in senior care because we offer comprehensive services to address the unique needs of older adults with the addition of the Center for Successful Aging.

Innovation thrives at MedStar Montgomery. Our culture encourages clinicians and all associates to test new ideas to improve care and experiences, to participate in clinical trials and research studies, and to find ways to deliver more value to our patients.

We're committed to creating a seamless customer/patient experience that exceeds expectations.

Your health and safety are our top priority. From focused measures to prevent the spread of infection to providing innovative and advanced medical treatment, MedStar Montgomery Medical Center is the right choice for your care.

We have been recognized and commended for our innovative, specialized, and compassionate care. We are also proud to be embarking on the journey to Magnet nursing recognition. This prestigious recognition will place our nursing team and hospital among the top in the nation.
