

MedStar National Rehabilitation Hospital

Welcome to your Level 1 OT Fieldwork experience!

We are looking forward to having you join our team for your level 1 fieldwork. This experience is usually scheduled early in the curriculum and is a good introduction to Occupational Therapy in an inpatient rehabilitation setting.

You will be assigned to a fieldwork educator who will be responsible for providing you with opportunities to observe individual treatment, group treatment, and team meetings. They will also facilitate the completion of any assignments you may have related to your fieldwork. In addition, this experience offers you the chance to learn or practice your professional and observational skills. These include, but are not limited to, rapport building, organization, time management, communication, and direct observation.

Please print the Level 1 questionnaire, complete it, and bring it on your first day. You may also get information on directions, dress code, and health requirements on the different tabs of this website.

Please get in touch with your assigned fieldwork educator prior to arrival. If you do not know who that is, please call the clinical fieldwork coordinator at MedStar NRH, Neepa Shah, MS OTR/L 202-877-1509.
